

Kerala to set up India's first Space Systems Park for global start-ups

T E NARASIMHAN
Chennai, 19 July

The Kerala government is planning to set up the country's first Space Systems Park at the Knowledge City in the state capital to attract global start-ups working in the space sector and also make it as a major manufacturing hub for space-related technology, research and development.

Dr APJ Abdul Kalam Knowledge Centre and Space

Museum will be also developed by Vikram Sarabhai Space Centre (VSSC), which is a major unit of Indian Space Research Organisation (Isro), as a befitting memorial to former president and top space scientist at the site. The state has issued orders to make the centre and space museum part of the Space Park and to allot the land required for the facility. This will be an added attraction to the Space Park and the entire investment will be made by the VSSC.

The government will transfer 20.01 acres of land as lease to the Kerala State Information Technology Infrastructure Ltd (KSITIL) to develop the Space Park within the Technocity. Of this, 16.07 acres, now having SEZ status, will be de-notified by KSITIL. The land belongs to Technopark. The project will be implemented by the electronics and IT department, government of Kerala. Primarily, a manufacturing hub for companies using GIS and other data systems, the

integrated complex will also have start-up incubator, accelerators including Airbus Bizlab, skill training systems and production units. KSITIL, the agency mandated to develop IT infrastructure in the state, will hand over required land to Isro to set up Dr APJ Abdul Kalam Knowledge Centre and Space Museum through a lease agreement.

A government order has already been issued in this regard.

DELHI EV TARGET 25% of registered vehicles to be electric by 2024

SHALLY SETH MOHILE
Mumbai, 19 July

The Delhi government targets having a fourth of the vehicles registered annually — public and private — to be electric by 2024 as it seeks to curb vehicular pollution in one of world's most polluted cities. This is part of Delhi's soon-to-be-announced electric vehicle (EV) policy, said an official familiar with the matter.

An estimated 700,000 to 800,000 vehicles are registered in Delhi every year. Automobiles account for 40 per cent of particulate matter (PM) and close to 80 per cent of the NOx emissions, according to a study by The Energy Research Institute (TERI) last year. With its EV policy, the Delhi government aims to cut vehicular pollution by half over the next five to 10 years.

Delhi released its draft EV policy in November 2018. It is set to notify the policy with amendments after the Cabinet approval in a month's time, said the person cited above. The Delhi government has an outlay of ₹150 crore for EVs for the current year.

Among other things, the policy will adopt the so-called "technology-agnostic"

ting up a charging point every 3 kilometres, over the next three years, to facilitate proliferation of EVs. For this, the government will seek participation from private players.

For public transport, the Delhi government is looking to have 50 per cent of the new vehicles registered to be electric in five years. It's in the process of procuring 1,000 e-buses — the largest for any state.

On the policy adopting a technology-agnostic approach for charging infrastructure, Mahesh Babu, CEO, Mahindra Electric — the EV-making arm of Mahindra and Mahindra — said while there are global standards available for charging, there are none for swapping. "The government should not
